HalSail FAQ

How do I enter details of boats?

To add a new boat click *New boat* in the *Boat* menu. This brings up a page where you can enter its details, including sail number, bow number if any, name, helm, crew, etc.

Entering a new boat in this way does not make it a member of any of the racing classes (fleets). In order to take part in any races it will need to be added to one or more classes. There is a list of available classes on the right of the page. Click on any of them to add it to that class and enter its handicap in that class if required.

In order to speed up the addition of similar boats you can make a duplicate. This will be another new boat that is automatically made a member of the same class(es) as the previous boat. You still have to enter sail number, etc.
