HalSail FAQ

How do I use the calendar to schedule races?

The calendar page (Schedule Menu) not only displays the races in your sailing programme, it also lets you edit their properties.

Whether you are logged in or not

Click any race with provisional or validated results to open the results page in a new tab.

If you are logged in as a sailing secretary or higher

Click any race with no results yet, or that is abandoned or cancelled, to edit its properties.

Click an empty space to schedule a new race.

Drag a race that has no results to another day to reschedule it to the same time on the new date.

Drag a race to another day while holding down the 'alt' key to copy it to the new date.
