HalSail FAQ

How is a boat's configuration described?

A boat's configuration has six components:

- **Category** - dinghy, cruiser, keelboat or multihull
- **Rig** - una, sloop, yawl or ketch
- **Keel** - none, cb *(centreboard)*, fin, drop, twin or triple
- **Engine** - none *(or outboard)*, IBF *(inboard with folding propeller)*, IB2 *(inboard with fixed 2 blade prop)* or IB3 *(inboard with fixed 3 blade prop)*
- **Spinnaker** - none, conventional or asymmetric
- **Persons** - the total number of people in the crew

If you are uploading boats from a spreadsheet, these components can be included in individual columns headed Category, Rig, Keel, Engine, Spinnaker and Persons.
