HalSail FAQ

Can I send emails with links to the latest results?

Anybody who is logged in can send emails with links to the results of a series. If you are logged in as a boat administrator, or higher, you do this from the Results Menu. If you are logged in as a race officer you do it from the Output menu. You choose the race whose results you wish to email, then choose the recipients.

Recipients are taken from email addresses recorded in the Boat Register. You can send emails to:

- all the boats in the racing class
- all the boats that have at least one result in the series
- or only those boats that are competitors in the particular race chosen.

In addition you can set up a list of supporters who will receive all result emails.
