HalSail FAQ

How do I personalise results with my own banner and logos?

Another FAQ tells you how the general public can see your results on the web without being logged into your account. When they do so they see the results with the name of your club at the top of the page, but no other personalisation.

If you want to personalise the results more, you can add your own banner and logos. You have to host each image on your own web site and provide HalSail with its web address.

Log into your account as a club administrator and open the *Admin* / *Club and user details* page. You enter the necessary addresses on the *Main settings* section. Hint: the easiest way to get the addresses is to view the page that shows the image, right-click it if you are using Chrome on a Windows PC or *ctrl+click* it in Safari on a Mac, choose 'Copy image address' and paste it into HalSail.

You may want one set of logos for normal club races and different logos for a particular event. You can do that by setting the necessary image addresses in the details of the event, in the same way as outlined above for the club-level images. The event logos will override the club logos when viewing the results of that event.
