**HalSail FAQ**

**What are racing classes in HalSail?**

A racing class is a fleet of boats that race together. They may all be the same type of boat (e.g. a class of Laser Radials, or Dragons) in which case they probably race level without handicapping, or they may be a fleet of mixed types racing under a  handicap scheme.

Races are always grouped into series. Each series has one or more races, up to a maximum of 100 races. You can set up any number of series of races for a given racing class.
