HalSail FAQ

What can I use boat selectors for?

Selectors (also known as selection flags) can be allocated to each boat in the *Boat Register*. They consist of the letters A to Z and the numerals 0 to 9. You can allocate as many of these to each boat as you wish.

Selectors can have any meaning you like. You allocate meanings using the tool in the *Boat Menu*. For instance you might have:

- G: This boat is a member of the Gold fleet
- S: This boat is a member of the Silver fleet
- L: This boat is helmed by a lady

If you specify the "Show selectors" switch when setting up a series, all results and entry lists will include the selection flags for each boat.

When you publish results you can filter them to show only boats with certain selectors
