HalSail FAQ

Can I publish my results on social media?

HalSail provides three main ways to publicise your results: sending emails containing links, or putting links on your own website, or via social media. This FAQ deals with social media. HalSail has inbuilt access to X (Twitter), WhatsApp and Telegram. They are available on the social media page under the *Results Menu*.

Twitter

You can send a tweet whenever you review your results. The default handle is @HalsRaceResults, so if your recipients follow that they will see any results.

If your club has its own X (Twitter) account, you can duplicate all tweets with your handle. To do that you need to enter your credentials on the *Admin / Club and user details* page in the section on "other details". If you have not already done so, you need to set up an app attached to your X account by going to the X development portal.

WhatsApp

From the social media page under the *Results Menu*, choose a series and click the WhatsApp button

Telegram

From the social media page under the *Results Menu*, choose a series and click the Telegram button
