HalSail FAQ

Can I upload my results from HalSail to the RYA Portsmouth Yardstick online database?

The RYA asks clubs to contribute to its database of results run under its Portsmouth Yardstick scheme. This is the way it gets up-to-date statistics about the relative performance of the different types of dinghy and small keelboat.

HalSail interfaces directly with the RYA's database. After analysing the handicaps of any series of races run under the PY scheme, in other words run for a class whose handicap type is RYA_PY, you can upload the results.

Click on the button marked *Upload to RYA PY database* set against the analysis results for each race, or scroll to the bottom of the page to upload all results in one go.

Note that in order for HalSail to log into the RYA database, you need to set up your credentials. Log in as an administrator and go to the *Account menu*. Click to edit your settings and put in your RYA PY login and password, which can be obtained from the RYA.
