HalSail FAQ

How do I view and edit my results?

You can view any of your results by going to the *Results* menu and clicking *Review results by series*. That takes you to a list of all the series that have any results. Click the *Results* button against the series of interest.

Alternatively you can go to the *Schedule* menu and bring up the race calendar. Click on any race shown in green on the calendar, which are the ones that have results as opposed to those that are in the schedule but have not been sailed yet.

Or you can choose *Race list* from the *Schedule* menu to show a list of all the races in date order. Click against any race to see the results.

Whichever way you arrive at the results screen, you will see the results of your race and if it is part of a series you will see the overall series results and the results of each individual race.

You have the opportunity to print the results of any of the races shown, or of the overall series results. You can also send an email to competitors with a link to the results, or you can send a X (Twitter) tweet with a link to the results.

You can also edit the details of any race, such as the race officer's name and the wind strength and direction.
