HalSail FAQ

How do I respond when a protest committee declares a race void?

There are two ways to void races that have already been run, so that their results are no longer visible and do not count towards overall positions in a series.

The first is to delete the race completely, together with all its results. You can do that from the schedule menu by going to the series in question and editing it. The list of races is at the bottom of the page. Select the race to be deleted and click *Edit or delete*. When the popup appears, select *Delete*.

The second way is to mark the race as abandoned. Go to the Schedule menu and find the series. Edit the series, then edit the particular race. Change the race's status to *Abandoned*.
